

essentials

2 in 1 steriliser

INSTRUCTIONS FOR USE

1 MICROWAVE STEAM METHOD

holds 4 wide neck bottles or 6 standard neck bottles designed with positioning tray for easy loading

1. BEFORE

sterilisation, wash all bottle and feeding accessories by hand or in a dishwasher (top rack only) to remove any milk residues. Separate all components i.e. teats, bottles, hoods, screw caps etc.

2. POUR

in 200ml of water into the central well in base.

3. LOAD

the bottles neck downwards in the slots provided and fit the teats, bottle hoods and tongs around the bottles. Ensure that all the items are arranged so that the steam can circulate around all surfaces, and any condensation can drain easily.

4. PLACE

in microwave.

5. MICROWAVE

on full power according to the guidelines shown on the following table

wattage	full power	cooling time
*1100w	4 minutes	6 minutes
850 - 1000w	5 minutes	6 minutes
up to 800w	8 minutes	6 minutes

6. COOL

for 6 minutes before removing the steriliser from the microwave. When opening the unit, point the lid away from you to allow the steam to escape.

WARNING

- Always add 200ml of water before use.
- Ensure the timer is set correctly on full power.
- When removing the steriliser from the microwave, take care as it will contain hot water and steam. Place on a hard, heat resistant surface.
- Always open the lid away from you to allow steam to escape.
- Do not use chemical sterilising solutions / tablets in the microwave.
- If you have a combination oven, ensure grill is switched off and the oven has cooled before use.
- Always follow loading instructions and do not overload.
- Do not use for metallic items as this will damage your microwave.
- Keep out of reach of children.
- Make sure that the microwave turntable is clean and dry before use.

LOCKABLE HINGED LID extra safe | allows condensation to run back into steriliser | if left unopened contents remain sterile for up to 3 hours
