

# Fibre Optic Lights

Using the latest LED technology to provide clear and crisp lighting for enhanced interactivity. Fibre Optic Light sources require no bulbs to replace whilst being small and silent.

They are ideal for inaccessible locations. Strands of light immerse the user to stimulate the senses visually as they passively cycle through a spectrum of colours. They also keep cool when in use and are completely maintenance free.

## Key Points

- › Safe, low voltage design
- › Can come with strands in 1m, 2m or 3m.
- › Dimensions of the unit 15.6cm x 7cm x 8.1cm
- › Cool to touch, perfect for tactile play.
