PROFESSIONAL BATTERIES

Select the right battery to match the power needs of your professional device.

RELIABLE POWER SOLUTIONS FOR EDUCATION

Procell has developed **THE WORLD'S FIRST DUAL PORTFOLIO OF PROFESSIONAL BATTERIES** to serve the needs of professional users and power profitability of their business.*

UNDERSTAND THE ENERGY NEED OF YOUR DEVICES:

PROCELL INTENSE POWER

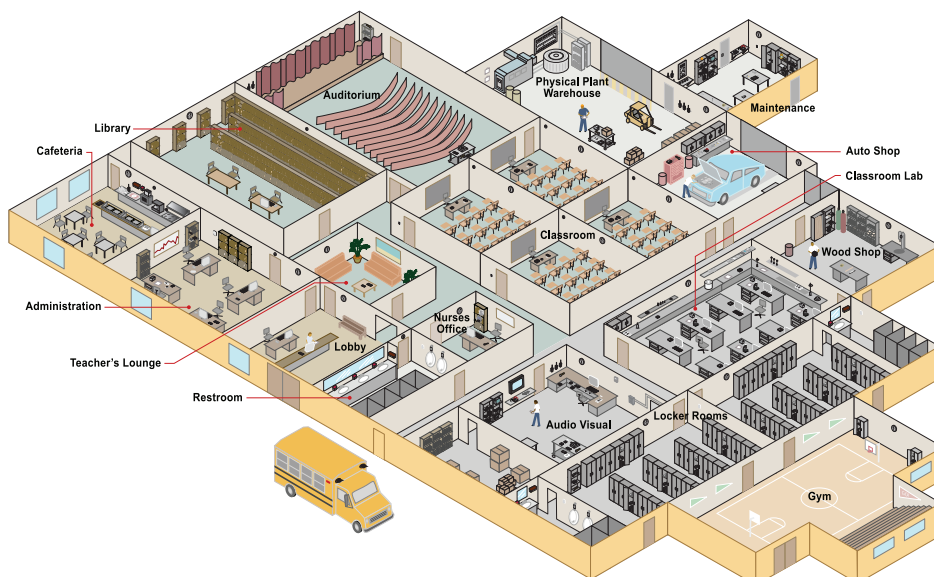

For High Drain Devices

High Drain Devices require high amounts of current over short periods of time, frequently. They often operate motors, pumps and other mechanisms that create motion, and might come with other energy intensive functions. They need batteries with less internal impedance and higher conductivity to withstand the pulses.

PROCELL CONSTANT POWER

For Low Drain Devices

Low Drain Devices typically use low levels of energy over a long period of time. They may have fewer energy intensive functions, and are idle most of the time. Due to their slow and steady current need they require batteries with high cell capacity and more active materials so that they can stay on for long periods of time.
