

# Blade 2.0 Rowing Machine

The Gym Gear Blade 2.0 Rower has been tested with 1,000,000 pulls from robotic arms without failure. The damper settings have a larger range of resistance from 1-10, which allows users to find the perfect damper setting for them. The base of the Blade 2.0 sits nearly 2' off the ground making it easier to get on and off and weighs nearly twice as much as our competitors. The seat is heavily padded so the user will be able to row more comfortably for longer periods of time.
