

Rubber Kettlebells

The Gym Gear Rubber Kettlebell offers maximum resilience and durability with a solid chrome build and rubber coating, while its stylish black and silver design featuring a chrome handle provides a premium finish and ultimate comfort.

Kettlebells are essential for any functional training programme. These conditioning tools are ideal for developing muscular endurance, increasing cardiovascular fitness, increasing core strength and improving posture / balance.

The weight of a kettlebell hangs a few inches below its handle, meaning you have to work continuously to control the kettlebells shifting centre of gravity as you move it around. Everything from your grip to your core has to work harder than if you were using a dumbbell, and this extra muscle activity results in more calories being burnt and increased fat loss.

Rubber & Chrome

Easy Weight Identification

2 Tier Rack

3 Tier Rack

Technical Specifications

Rating	Commercial
Material	Rubber & chrome
Sets available	8 x Kettlebell Set (1 x 4, 6, 8, 10, 12, 16, 20 & 24kg)
