

Bacteria Removal Test Report Statement

Evaluation of the effectiveness of Vileda Professional products in removing bacteria

The objective of the test was to evaluate the efficacy of specified Vileda Professional products (listed in Table 1) at removing bacteria on PVC flooring under standard conditions with two bacteria test strains (*Pseudomonas aeruginosa* and *Staphylococcus aureus*).

Test Method

Test methodology was based on EN 11737-1: 2009-09: Determination of a population of microorganisms on products. The test was conducted on a vinyl flooring surface with a true and realistic mechanical wiping motion.

The mops were soaked with purified water (according to dosing recommendation for customer).

Table 1 below shows the bacteria removal rate of the specified Vileda Professional products. Please contact Vileda Professional for the full test report.

Table 1: Bacteria Removal Rate

Product Name	Bacteria Removal Rate
r-MicroSpeed Max Mop	99,99%
r-MicroLite Max Mop	99,99%
r-Trio Max Mop	99,99%

Tests were conducted by an external test institute in August 2023.
