

r-MicroLite Max mop

The XL-performance and hygiene specialist

Product description

The new single sided flat mop r-MicroLite Max mop is significantly upgraded in functionality, hygiene, durability and sustainability for professional cleaning application to enhance the performance of the floorcleaning system CombiSpeed Pro. The mops are made from fully recyclable mono-material and contain more than 35% recycled materials.

The easy gliding mop with its microfibre structure ensures deep cleaning effect while its all-over scrubbing islands are perfected to loosen sticky dirt. Its advanced XL mop architecture shows symmetric cleaning lips for fast and efficient cleaning of corners and skirting boards.

The r-MicroLite Max mop allows efficient professional cleaning of larger areas with up to 30 m² (40cm mop) and is available for all 3 floorcleaning systems in specific widths.

Application area

r-MicroLite Max mop is a hygiene specialist with deep cleaning effect. It is an ideal mop in a multitude of environments such as healthcare sites, like hospitals, old peoples home as well as general building cleaning sites, like office environments, residential properties and schools and hotel and in hotel and restaurants applications.

Its extra-large mop construction offers efficiency and cleanliness for all cleaning methods from bucket and press, spray-cleaning as well as pre-prepared. Suited for cleaning of sealed or smooth hard floor surfaces and is a specialist on structured vinyl design floors.
