

### **Tork OptiServe® Coreless Toilet Paper**

472630

### **Description**

Tork OptiServe® Coreless is a high-capacity toilet paper system for facilities where efficiency, sustainability and providing a great experience are key. It's a better alternative than conventional toilet paper and traditional jumbo rolls. The wide offer of dispensers means different needs within a facility can be met with only one type of toilet paper.

- Perforated 2-ply coreless toilet paper with attractive design
- 3x more paper compared to conventional rolls to avoid run-outs
- · Compact rolls: refill less often and save time
- No core and no wrap means less waste
- Half the storage space vs conventional toilet rolls
- Tork Easy Handling® packaging for ergonomic carrying
- Space saving
- Coreless
- High capacity
- Embossing

### **Environmental Information**

Content	The product is made from Recycled fibres Chemicals The packaging material is made from paper or plastic.
<section-header></section-header>	Recycled fibres Recycling of paper is an efficient use of resources as the wood fibres are used more than once. High demands are put on quality and purity of recovered paper, considering each step of the chain (collecting, sorting, transporting, storage, use), to ensure safe and hygienic products. Recycled fibres can be produced from different types of recovered paper, such as collected newsprint, magazines, office waste, paper cups, drink cartons, corrugated boxes and paper hand towels. The choice of recovered paper grades is made for each product, depending on its specific requirements on performance properties and brightness. The paper is dissolved in water, washed and treated with chemicals under high temperature and screened to separate out impurities. Bleaching of pulp, used for tissue, is primarily a process to remove substances that could have a negative effect on important properties of the finished product such as purity, absorption, strength and colour of the pulp.Bleaching of the recycled fibre pulp is done using chlorine-free bleaching agents (hydrogen peroxide and sodium dithionite). Some of our products are bleached and some are not. For bleached products we use bleaching agents (to increase the brightness of pulp from recovered paper).
	All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view. To control product performance we use additives: <ul><li><li><li><li><li><li><li><li><li><l< td=""></l<></li></li></li></li></li></li></li></li></li></ul>

#### Environmental certification

This product is certified with the EU Ecolabel with certificate number SE/004/001. This product is

# **Tork OptiServe® Coreless Toilet Paper**

472630

	certified for FSC® with certificate number SA-COC-08266.
Packaging	Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
Article creation date and latest article revision	Date of issue: 03-07-2024 Revision date: 26-03-2025 
Production	This product is produced at Hondouville - FR mill and certified according to ISO 9001, ISO 14001 (Environmental management systems), BRC-IoP, ISO 45001, ISO 50001 and FSC Chain-Of-Custody.
Destruction	This product is suitable to be taken care of in the normal sewage system of the community.
